President of the
Croatian Chamber of
Economy

FOREWORD

Our defence industry is recognized as an internationally renowned brand and a reference for the entire economy. Our companies have achieved the status of proven suppliers through the continuous development of their products since the Homeland War and by maintaining the highest international quality standards.

Opportunities for product placement through specialized world fairs with the financial and logistical assistance of the Croatian Chamber of Economy have contributed to this, too. In the course of the 23 years of its activity, the Defence Industry Association of the Croatian Chamber of Economy has been continuously working on the presentation and promotion of its members, not only through the organization and co-financing of trade fair participations but also through meetings with foreign delegations and key players.

Due to NATO membership, the Croatian economy has an open door to the world of business and competition with the best. As part of the "Croatian Economy and NATO" Government project, the Croatian Chamber of Economy informs entrepreneurs about all business opportunities provided through their membership. CCE also issues expert opinions for companies that want to apply for NATO tenders.

We regularly provide evaluations of current regulations to increase efficiency and reduce administrative barriers. We continue with our activities in this direction because we want to strengthen the position of companies in public discussions. It is vital for us to facilitate the process of issuing export licenses as much as possible.

It is a resilient and export-oriented industry. Defence industry companies and members of the Defence Industry Association of the Croatian Chamber of Economy are recognized as reliable and verified suppliers with top-quality products. Their strength also contributes to the brand of Croatian industry and the economy as a whole.

If we look back on the past 23 years of activity of the Defence Industry Association of the Croatian Chamber of Economy, the most crucial segment of the Chamber's work is the internationalization of our defence industry. The defence industry is specific compared to others since fairs are one of the most crucial marketing channels for product presentation and a meeting place with potential customers. At these fairs, customers' great interest in our companies' products resulted in concrete business deals.

As for our future plans, we aim to expand the Association to other areas because this industry covers a wide range of products. They include overhaul of military ships, manufacturers of software solutions intended for the military, production of communication equipment, special food products, and cybersecurity. Also, one of the most important goals is to expand contacts and cooperation with other international organizations.

Our companies are proud of respectable foreign testimonials, like NATO and the U.S. federal agency FBI. In addition to developing defence products and military production technology, members of the Defence Industry Association of the Croatian Chamber of Economy regularly improve the quality of existing products and develop new ones per world standards and trends. Today, they are known as reputable weapons and military equipment manufacturers and proven suppliers in Croatia and abroad.

Željko Pavlin
President of the
Defence Industry
Association of the
Croatian Chamber of
Economy

ADRIATIC WORKING DOGS LLC

Founded: 2024

Size: micro

Employees: 5

Address: Donji Brinjani 44, 44320, Brinjani (City of Kutina), Republic of Croatia

PROFILE - ABOUT US

Adriatic Working Dogs LLC (AWD) is a Croatian company specialising in the selection, breeding, and professional training of working K9 dogs for military, police, security, and search and rescue applications. AWD's certified instructors and K9 specialists deliver mission-ready dogs trained to the highest international standards across a broad range of disciplines, including but not limited to explosive detection, patrol, tracking, and personnel protection.

Beyond dog procurement and training, AWD offers a comprehensive portfolio of complementary services: professional K9 seminars and handler training, operational and strategic consulting, humanitarian demining support, and premium working dog nutrition. A key differentiator is AWD's integrated K9–drone tandem system, combining aerial surveillance with ground-level detection to significantly enhance operational effectiveness in complex environments. AWD serves defence ministries, law enforcement agencies, and security organisations across Europe and beyond, delivering tailored solutions backed by verified field performance and internationally recognised expertise.

PROFILE - ABOUT US

BELINA is well known manufacturer in Croatia, as well as foreign markets for more than 40 years. BELINA is a medium sized company, headquartered in Krapinske Toplice. The company BELINA has over 70 employees and a very diverse product portfolio. One of Belina's basic activities is processing of technical textile, we use certified PVC materials aligned with German and Austrian standards. We specialized in producing special purpose shelters and covers for military equipment and weaponry systems. BELINA is certified for the production of truck superstructures and PVC tarpaulins in accordance with the technical requirements of the German armed forces (TL 8305-0253). The flexibility of production processes, allows us to create sustainable tents that are fully aligned with the wishes and needs of our clients. BELINA also manufactures Combat Identification Panels (CIP Panels) and Mobile Universal Re-assembly Object (MURO), that is seemingly an ordinary trailer, however, once it is deployed, it takes only 5 minutes to assemble and occupy 50 square meters of closed area.

ACTIVITIES AND PRODUCTS

- Special purpose tents (Military, Police, Red Cross, Civil Defense agency)
- Tent covers and complete tent system production
- CIP panel production
- PVC tarpaulin and cotton covers for various military equipment and weaponry systems

BETON-LUČKO d.o.o.

Founded: 1986.

Size: Medium sized company

Employees: 81

Address: Puškarićeva 1b, 10250 Lučko

Phone: +385 1 6599 700

E-mail: info@betonlucko.hr

Web: www.betonlucko.hr

PROFILE - ABOUT US

"Beton Lučko" has been a presence in the Croatian market for 37 years, with production facilities located in Lučko and Karlovac and a sales center in Lučko. Since its establishment in 1986, our expert teams have continuously worked on developing new technologies, products, and improving quality. The company has been certified under EN ISO 9001 since 2004, and we hold certificates for factory production control issued by approved bodies. Product quality is rigorously tested in our own laboratory, as well as in the laboratories of notified bodies and accredited facilities.

In the production of precast concrete products, we adhere to customer requirements, legal regulations, and provisions outlined in the factory production control documents and specific technical specifications. We are proud to announce our official partnership with the IBIPC Institute of Blast & Impact Proof from the Czech Republic. This collaboration involves intensive work on developing new technologies for producing protective elements, aiming to provide a high level of protection for both military and civilian structures. As part of this agreement, we are committed to sharing Know-How, human and material resources, and intellectual rights, including industrial property belonging to the INSTITUTE BLAST & IMPACT PROOF CONCRETE. These resources will be leveraged to support the successful implementation of the Master Franchise Agreement and the exceptional outcomes of research and development on a unique ballistic, explosion, and shrapnel-resistant composite derived from UHPFRC. For more information, please visit www.ibipc.com.

ACTIVITIES AND PRODUCTS

- Development of new technologies for the production of concrete elements.
- Mobile T-wall element for the rapid establishment of a high level of security for military and civilian objects. This composite is made of ultra-high-performance concrete with dispersed microfiber reinforcement of ULTRA HIGH PERFORMANCE FIBER REINFORCED CONCRETE (UHPFRC) and high-strength steel.
- APB HOUSES for electronic equipment to secure railway-road crossings and for GSM equipment and other electronic equipment on the railway line.
- NOISE PROTECTION WALLS, type Ruconbar, which reduce the impact of noise caused by traffic and improve the quality of life along roads and railways.
- The HŽ PLATFORM ELEMENT, a retaining wall for railways.
- LINEAR DRAINAGE CHANNELS for the collection and drainage of rainwater in traffic areas.
- U and E CHANNELS for the installation of power and data cables on railway tracks.
- TACTILE PAVING FLAGS, used to warn blind and partially sighted people about dangers on the road (such as stairs, obstacles, changes of direction, pedestrian crossings, or the end of the railway platform). Tactile slabs with plugs are used to mark the stop line, while tactile slabs with stripes are used to mark the guideline.

PROFILE - ABOUT US

Shipyard of Special Facilities Ltd, owned by Brodosplit JSC, is a member of the family-owned DIV Group. Established in 1964 within the large shipyard Brodosplit, Shipyard of Special Facilities was created for the construction of submarines and naval ships. Over its almost 60-year history, it has delivered three classes of submarines and two types of divers (in 1970s and 1980s), along with naval ships, ferries, research, and work ships. Recently, Shipyard of Special Facilities completed the delivery of a coastal patrol vessel for the Croatian Coast Guard (Ministry of Defence). The vessel is 43.16 meters long and can reach a speed of 28 knots at 90% MCR-a, making it highly capable of pursuit. It boasts a large navigational range and can stay at sea for ten days with 16 crew members. The cruising range at speed of 15 knots is 1.000 NM. Furthemore, the shipyard is developing a new project - construction of an multi purpose Offshore Patrol Vessel – Crorvette. Corvette is 90.7 m long, with maximum speed 26 knots and patroll speed 22 knots. The cruising range at speed of 16 knots will be at least 3.000 NM.

PROFILE - ABOUT US

HyperBUNKER d.o.o. is a Croatian company founded by HyperBUNKER Ltd, London, UK. The company developed a physical recovery anchor designed to support the restart of critical systems after severe cyber compromise. It preserves a defined set of mission-critical data outside production and conventional recovery environments.

The system is intentionally independent of domain controllers, identity services and network-exposed management interfaces. It is designed to remain accessible even when primary infrastructure and recovery environments cannot be trusted.

Built on patented architecture (US patent), HyperBUNKER provides a physically isolated, offline preservation layer for critical data in defence and high-assurance environments.

- Physically isolated: no network connectivity, fully offline
- Controlled one-way ingestion: no exposed software attack surface
- Mechanical isolation with timed disk rotation
- Tamperevident design supporting high-integrity recovery
- 100% ransomware & hacker protection
- Offline vault in online world
- Make your critical data invisible for any attacker.

ACTIVITIES AND PRODUCTS

HyperBUNKER is a Hardware as a Service (HaaS) solution that is scalable without limits and can provide the same-day restore.

INFIGO IS d.o.o.

Founded: 2005

Size: Medium sized company

Employees: 100+

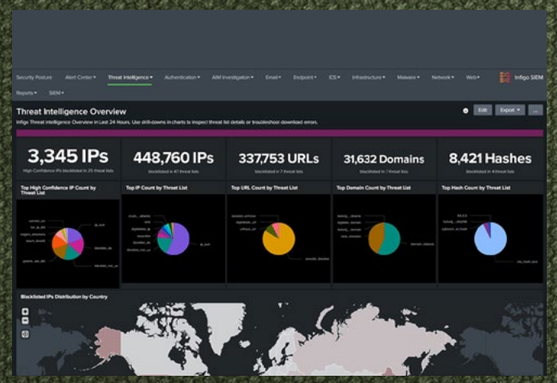

Address: Karlovačka cesta 24A, 10020 Zagreb

Phone: +385 1 4662 700

E-mail: info@infigo.is

Web: www.infigo.is

PROFILE - ABOUT US

Infigo IS was founded in 2005 as an infosec consultancy, but quickly expanded into Splunk integration and consulting, developed its first Splunk software product, and transformed into a software and solution development, and business consultancy company. Today Infigo has offices in five countries and operates on three continents.

Its focus is on information security through security solution delivery, cyber risk and compliance consulting, security assessment and protection services, and in-house developed software products. Its core services include a myriad of security assessments – vulnerability scanning, penetration testing, red team exercises, and all that has evolved and transformed Infigo into a MSSP (Managed Security Service Provider).

ACTIVITIES AND PRODUCTS

- Managed Services – Managed SOC, Managed EDR, Cyber Threat Intelligence, Cyber Incident Response, Digital Forensics
- Products (own IP) – Infigo SIEM, Infigo FRAML (fraud and anti-money laundering), Infigo Compli
- Solutions Delivery – integrating Infigo and partners' products (specializing in Splunk, CrowdStrike, Cribl, Wallix), professional services (triple elite Splunk partner)
- Security Assessments – penetration testing, custom tests, source code audits, red team exercise, vulnerability scanning
- Consulting – cybersecurity consulting, payment security, cloud & AD security, ISMS, privacy and data protection, audit and assurance

THEMATIC AREA OF ACTIVITY

SECTOR:

Enterprise / Financial / Telecommunication / Defense

PROFILE - ABOUT US

TACTICAL, WORK & SAFETY FOOTWEAR MADE IN CROATIA
Inkop is a privately owned footwear manufacturer whose foundations date back to 1919, when the first leather factory was established in the small town of Poznanovec in north-western Croatia, 50 km north of Zagreb.
Quality is our top priority – we employ a team of highly skilled craftsmen and experienced production specialists who have a deep understanding of the footwear industry.
Inkop produces protective footwear for outdoor and indoor professional work activities, law enforcement and peacekeeping, compliant with European standards EN ISO 20347, EN ISO 20345, EN ISO 17249. Some 60% of our 100 employees are skilled craftspeople with 30+ years of work experience in Inkop.
The brand Inkop stands for innovation and safety - all our shoes and boots are designed to maximize performance and ensure the highest level of comfort in all weather conditions. Inkop cultivates the necessary skills, expert knowledge and competence to meet superior standards of functionality, quality and design, offering excellent value for money.
Every single part of our footwear originates from Europe and is expertly manufactured by our experienced craftsmen who transform quality raw materials into first-rate products.

ACTIVITIES AND PRODUCTS

- Tactical footwear (police and military)
- Workwear (OB, O2, O3)
- Safety shoes (S2, S3)
- Trekking & Hiking shoes
- Forestry boots with cut and puncture protection

JACQUARD

JACQUARD d.o.o.

Founded: 1984

Size: small

Employees: 32

Address: Samoborska 256

Phone: +385 98 578703

E-mail: jacquard@jacquard.hr

Web: www.jacquard.hr

PROFILE - ABOUT US

Production

The main activity of Jacquard d.o.o. is weaving: labels, emblems, flags ... But our entire range also includes hats, wool hats and T-shirts of our own high quality brand, and applying our woven products to these aforementioned products.

Weaving

In our weaving facility are exclusively top-quality machines from the leading Swiss manufacturer Muller. Our team goes through their education. Only 100% polyester yarn is used in the weaving.

Fabric treatment (gluing, pressing, cutting, sewing)

Depending on the needs of our parties, the fabrics are just cut or further stiffened to provide the desired finishing edge. But besides woven products, we also offer stitching (machine embroidery) or printing.

Our goal is to present your logo or design on everyday objects, whether it be uniforms for your employees, sports equipment with a prominent coat of arms of your sports club, or business gifts

ACTIVITIES AND PRODUCTS

- We produce textile woven (jacquard) labels and printed labels.
  The difference between woven and printed textile labels is that printed labels are printed on the material and then sewn or glued to textile clothing while woven (jacquard) labels are produced with a backing and a logo on our looms.
- Emblems can be divided into woven and sewn. Woven emblems are made from polyester thread, this enables the smallest details that we cannot create by embroidery or printing to be seen on the logo itself. Embroidered emblems are made on a material such as twill, etc., or can be made directly on a hat, t-shirt, shirt, work clothes, jacket or vest.
- We make flags of various sizes and for various purposes: large and small flags, table flags, car flags, fan flags, mast flags, flagpole flags.
- Pendants are hung on essentials such as keys, bottle openers, small lamps.
  We produce woven, rubber, plastic, metal and floating pendants.

THEMATIC AREA OF ACTIVITY

SECTOR:

PROFILE - ABOUT US

Technical textile manufacturer, specialized for narrow fabric production, located in central Europe, Mursko Središće, Croatia. Production takes place on more than 3000 m2 of covered space. With more than 150 weaving, knitting and braiding machines, as well as dye and digital print machines, our annual capacity is over 100 million meters of various narrow fabric products.

Production is mainly focused on developing techical textiles, mostly for military market, personal protective equipment but also for firefighters.

We are leaders in developing digital IRR printing on webbings and Cordura® fabrics, with strong R&D department for special products.

Our Quality management system is certified according to ISO 9001:2015 and ISO 14001:2015 standard. Our products are also certified according to OEKO-TEX® Standard 100 (REACH included).

FOREWORD

Pointers d.o.o. is a Croatian defence technology company developing POINTERS GUARDIAN — an integrated multi-sensor survivability, force protection and situational awareness platform for military personnel, first responders and critical infrastructure operators.
POINTERS GUARDIAN addresses a critical operational gap: personnel operating in complex environments today carry multiple separate devices for vital monitoring, hazard detection, positioning and communication. POINTERS GUARDIAN integrates all these capabilities into a single modular platform with real-time command centre connectivity, AI-assisted decision support and resilient multi-channel communication — including satellite link for GNSS-degraded and EMCON environments.

ACTIVITIES AND PRODUCTS

POINTERS GUARDIAN Platform
Advanced modular dual-use platform supporting:

- Force protection capabilities
- Personnel survivability enhancement
- Situational awareness and operational support
- Distributed sensing and environmental awareness
- Resilient communication support
- AI-assisted operational decision support
- Mission support and interoperability capabilities

POINTERS GUARDIAN B represents the primary integrated system and core operational platform of the POINTERS GUARDIAN ecosystem.
The system is designed as a body-mounted modular unit intended for military personnel, first responders, civil protection teams and critical infrastructure operators working in demanding operational environments.
The platform integrates survivability support, operational awareness, distributed sensing, mission support capabilities and interoperability functions into one integrated system architecture.

POINTERS GUARDIAN S is a smaller tactical system intended for personnel and special operational environments. The device is optimized for integration with tactical equipment and can be mounted on ballistic vests, combat uniforms, sleeves, personal load-bearing equipment or other body-mounted positions.
The system is designed for tactical units, special operations teams, first responders and personnel operating in highly dynamic environments where reduced size, mobility and operational flexibility are critical mission requirements.

POINTERS GUARDIAN Helmet Integration
Integrated smart helmet capability concept intended to provide additional operational awareness, sensor integration and mission support functions through interoperability with the POINTERS GUARDIAN ecosystem.
The solution supports future soldier systems concepts and interoperability with defence and emergency response environments.

THEMATIC AREA OF ACTIVITY

SECTOR:
Defence / Armed Forces / Police / Civil Protection / Firefighters / Search & Rescue / Critical Infrastructure / Industrial Safety / Emergency Response / VIP security

THEMATIC AREA:
Force Protection / Soldier Systems / Situational Awareness / Distributed Sensing / Mission Support / AI-enabled Systems / Dual-use Technologies / Operational Resilience / Interoperability

LEVEL:

Integrated Platform / Subsystem / Interoperability Solution / Advanced Technology Solution / R&D Capability / Mission Support System

SPECIALIZATION:
Advanced Technology Solution / R&D Capability / Mission Support System

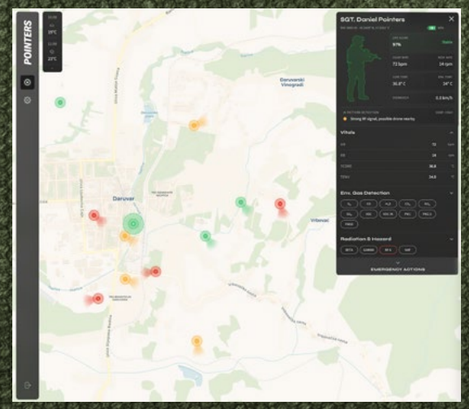

QUALITY:
Platform developed in alignment with NATO operational concepts and interoperability requirements.

MAIN CUSTOMERS:

PROFILE - ABOUT US

Probotica is a Croatian technology company focused on advanced robotics, mechatronics, and unmanned systems development for demanding industrial, security, and defence-related applications. Combining expertise in mechanical engineering, electronics, embedded systems, software, and systems integration, the company develops reliable and adaptable robotic solutions tailored to complex operational environments.

With strong focus on innovation, rapid development, and practical engineering, Probotica is active in the development of autonomous and remotely operated mobile robotic platforms and enabling technologies. Through participation in advanced R&D and integration projects, the company continuously expands its capabilities in robotics, automation, communication, and intelligent control systems.

Driven by a flexible and engineering-oriented approach, Probotica delivers efficient, robust, and mission-oriented solutions while continuously investing in technological advancement and multidisciplinary expertise.

RIZ – PE d.o.o.

Founded: 1948

Size: Small sized company

Employees: 14 + contrators

Address: Križnog puta 62, 10040 Zagreb

Phone: +385 1 2310 547

E-mail: riz-pe@riz-pe.hr

Web: www.takrad.hr

PROFILE - ABOUT US

RIZ PE is a Croatian company with 75 years of tradition-experience, 45 product brands and 5 types of services.

RIZ PE is a long-time partner of the Ministry of Defense of the Republic of Croatia as a domestic manufacturer of military communication devices and systems.

The main product of RIZ PE is a MANET tactical radio based on SDR technology designed for a dismounted soldier and vehicular communications - TAKRAD. The device is intended to be a natural soldier connection in the tactical radio network, requires minimal involvement in technical radio setup, and allows mission focus.

The device enables simultaneous voice and data communication within two independent networks simultaneous communication with lower and higher echelons. The modern SDR platform enables uninterrupted reliability and communication stability with the dismounted soldier with a high level of communication protection by implementing a certified crypto protocol (AES 256) and DSSS FH capabilities. TAKRAD ensures reliable MANET functionality.

ACTIVITIES AND PRODUCTS

General objective

1. Research activities on technologies for secure communications and for innovative service.
2. International cooperation with similar Companies.

Specific objective

The main achievements of RIZ PE in 2024. are:

1. Equipping the Croatian Armed Forces (CAF) with TAKRAD
2. Modernization of mobile communication systems in CAF.
3. Development of existing services.
